HONEY MARKET FOR THE MONTH OF NOVEMBER, 2004 IN VOLUMES OF 10,000 POUNDS OR GREATER UNLESS OTHERWISE STATED

Prices paid to beekeepers for extracted, unprocessed honey in major producing states by packers, handlers & other large users, cents per pound, f.o.b. or delivered nearby, containers exchanged or returned, prompt delivery & payment unless otherwise stated.

- REPORT INCLUDES BOTH NEW AND OLD CROP HONEY -

ARKANSAS	- Soybean, extra light amber, 75¢ - - - - - Soybean, light amber, 70¢
CALIFORNIA	- Cotton, extra light amber, 89¢ - - - - - Cotton, light amber, 69 - 76¢ - Cotton, amber, 69¢ - Cotton/Alfalfa, extra light and light amber, 70¢ - Mixed Flowers, extra light amber, 65¢ - \$1.05 - - - - - Mixed Flowers, light amber, 65 - 75¢ - Orange Blossom, white, \$1.30 (previously contracted) - Orange Blossom, extra light amber, 96¢
COLORADO	- Alfalfa, light amber, 70¢
FLORIDA	- Gallberry, light amber, \$1.05* - - - - - Gallberry, cut comb, \$1.50 - Gallberry/Saw Palmetto, extra light amber, 96¢ - Orange Blossom, white, \$1.04 - 1.25* - Pomegranate, light amber, 70¢ - Saw Palmetto, extra light amber, \$1.05 - Tupelo, extra light amber, \$1.65 (small lot) - Wildflowers, light amber, 70¢ (small lot) * Previously contracted
IDAHO	- Alfalfa, white, \$1.09 - 1.10 - - - - - Alfalfa, extra light amber, 69 - 89¢ (lower price, small lot) - Alfalfa, light amber, 69 - 76¢ - - - - - Alfalfa, amber, 69¢ - Star Thistle, white, \$1.05
INDIANA	- Clover, white, \$1.05 (small lot)
KANSAS	- Alfalfa, extra light amber, 90 - 92¢ - Clover, white, \$1.15
MICHIGAN	- Clover, light amber, \$1.20 (small lot)
MINNESOTA	- Clover, white, \$1.05 - 1.07 - - - - - Clover, extra light amber, \$1.05 (small lot)
MONTANA	- Alfalfa, extra light amber, 90¢ - Clover, white, \$1.10 - \$1.24
NEBRASKA	- Alfalfa, light amber, 70¢ (small lot) - Clover, white, \$1.10
NORTH DAKOTA	- Alfalfa, white, \$1.05 - Clover, white, \$1.05 - 1.10 - - - - - Clover, extra light amber, 90¢ - \$1.05 - Clover, light amber, 70¢ - - - - - Clover, amber, 67¢ - Wildflower (melter honey), amber, 67¢
OHIO	- Alfalfa, light amber, 70¢
OREGON	- Alfalfa, extra light amber, 89¢ - - - - - Alfalfa, light amber, 69 - 79¢ - Alfalfa, amber, 67¢

SOUTH DAKOTA	- Alfalfa, white, \$1.20 - Clover, water white, \$1.20 ----- Clover, white, \$1.05 – 1.15 - Clover, amber, \$1.10
TEXAS	- Chinese Tallow, light amber, 69.5¢ - Cotton, extra light amber, 95¢ ----- Cotton, light amber, 90¢ - Mesquite, extra light amber, 90¢
WASHINGTON	- Clover, white, \$1.05 ----- Clover, extra light amber, 98¢ - Star Thistle, extra light amber, \$1.09 ---- Star Thistle, light amber, 89¢ - Wildflower (melter honey), light amber, 67¢ ----- Wildflower (melter honey), amber, 62¢
WISCONSIN	- Alfalfa, white, 98¢ - Clover, white, \$1.00 – 1.05 ----- Clover wax, \$1.10
WYOMING	- Clover, extra light amber, \$1.01

Prices paid to Canadian beekeepers for unprocessed bulk honey by packers & importers in U.S. currency, f.o.b. shipping point, containers included unless otherwise stated. Duty & crossing charges extra. Cents per pound.

ALBERTA	- Clover, white, \$1.05
PROVINCE NOT REPORTED	- Canola, white, 99¢ - \$1.09 ----- Canola, extra light amber, 89¢

Prices paid to importers for bulk honey, duty paid, containers included, cents per pound ex-dock or point of entry unless otherwise stated.

EAST COAST.....	ARGENTINA	- Mixed Flowers, white, 99¢ - - - - Mixed Flowers, extra light amber, 99¢ - Mixed Flowers, light amber, 99¢
	BRAZIL	- Mixed Flowers, extra light amber, 94¢ - \$1.09 - Mixed Flowers, light amber, 74 - 95¢
	MEXICO	- Mesquite, white, 98¢
GULF COAST.....	CHINA	- Mixed Flowers, light amber, 62¢
WEST COAST.....	VIETNAM	- Mixed Flowers, light amber, 65¢ delivered
	CHINA	- Mixed Flowers, white, \$1.15

COLONY, HONEY PLANT AND MARKET CONDITIONS DURING NOVEMBER, 2004

ARIZONA * * *

Temperatures were below normal in all parts of the state for most of the month with frequent scattered rain falling around the State. Most areas report below normal precipitation for the year. Bees mostly worked desert & backyard plant bloom but activity was limited.

ARKANSAS * * *

Pollen and nectar sources are a few wild flowers. Bee colonies are strong and healthy. Weather has been rain, after rain and after more rain, with no honey production this time of year. AC's are watching to see when it will be necessary to start feeding the colonies. Barrels of honey from the '04 crop keep customers supplied. The demand stays pretty much the same. AC's looking more to taking care of equipment now as nearly all beekeepers do during the winter months.

CALIFORNIA * * *

On the 3rd, a cold front moved into Northern California bringing rain and heavy snows to the Sierra Nevada Mountains. Downtown Sacramento recorded a daily record .81" on the 11th. The pattern continued to the 15th and then the State had a short reprieve from the stormy weather. Rain, snow and high winds returned on the 20th causing local flash flooding, but boosting higher elevation snowpacks. From the 20-22nd, the San Gabriel Mountains received 3-4 feet of snow. Cold temperatures accompanied the storms with some areas dropping to record lows. These conditions continued through the 27th and the last few days of November were dry but cold.

Currently, beekeepers are spending a considerable amount of time and money to combat a serious mite problem. They are concerned about getting their colonies strong enough for the almond pollination early next year. The cool, damp weather the last couple of months hasn't helped with the mite problem but the rain could be very beneficial for early spring plants. At the end of the month, beekeepers continued to feed and treat their colonies. They were also negotiating contracts with almond growers.

Packers continue to purchase some of this year's moderate crop. Producers are not pleased that prices are dropping so some are only selling when they need the cash. Packers have reduced their prices on honey sold to commercial users several times recently but some report they are still not regaining the companies that reformulated their products when honey process were so high. They talk frequently to these commercial users, especially when prices drop, to try to regain their business.

COLORADO * * *

Typical weather covered the state during the month allowing no flight time for the bees. Bees are in fairly good condition with apiarists following treatment programs for mites. Some hives have gone to California with more to follow in December. Those that weren't moved to warmer climates are being stored for the winter.

FLORIDA * * *

Very little is happening right now in regards to honey production. Very little surplus production is going on. Spanish Needle and Melalucca are available in the southern part of the state. Some Goldenrod is still available in the northern parts of the state. Hives can maintain themselves but will produce little extra.

GEORGIA * * *

Colonies around the state were in fairly good condition. Many colonies during the month continued to be in need of additional feeding with sugar or corn syrup due to the disappointing fall honey flow. During November there were no significant sources of pollen and nectar. Colony populations continued to decline in preparation for over-wintering. By the end of November the populations of drones were essentially killed off. Weather during November featured warm to mild days and cool to cold nights as the month progressed. Moisture conditions were generally adequate. Trade sources report demand for honey by packers from producers was light in response to competition from imports.

IDAHO * * *

Temperatures were cold, conditions were windy. Not much moisture fell during the month of November. Bees are in fairly good condition. Beekeepers are treated mites and prepared the hives to go to California to pollinate the almonds. More hives are scheduled to go to California in December.

ILLINOIS * * *

Beekeepers continued to prepare hives for overwintering. The weather conditions for the month were ideal. High temperatures in the mid 50's to mid 60's were unusual for the month. In southern areas, rose bushes were in bloom. Most of the State had no killing frost reported as dandelions were still in bloom. Most beekeepers reported bees were in excellent condition heading into winter. Very little supplemental feeding was reported due to colonies having ample stores.

Honey demand was reported very well due to holiday baking demand. Bulk honey movement was slow.

INDIANA * * *

Beekeepers had been treating colonies and the Chief Apiary inspector urged beekeepers to remove all treatments from colonies as hives were readied for overwintering. Beekeepers were starting supplemental feeding in most colonies. Most of the State reported varied amounts of rainfall with soil moisture reported as surplus. The fall State meeting was well attended and featured many speakers who were well received by the group. Beekeepers had been busy repairing equipment and building new hive boxes and supers.

Honey movement was reported very well due to holiday baking. Bulk movement was slow due to available supplies.

MINNESOTA * * *

The state saw typical weather during the month of November, allowing no flight time for the bees. Those bees that are not being stored in State for the winter are going to Texas for pollination. Beekeepers are performing regularly scheduled hive maintenance and treating for mites as needed.

MISSISSIPPI * * *

Colonies around the state were in generally good condition. Some colonies during the month were in need of additional feeding with sugar or corn syrup, while many were sustaining themselves on stores of honey. In southern Mississippi, there was some gathering of pollen from fall wildflowers but no significant nectar sources. In the central and northern portions of the state, there was a relatively small amount of pollen and nectar gathered from aster early in the month but no significant pollen and nectar sources in the second half of the month. Statewide, colony populations continued to decline during November in preparation for over-wintering. By the end of the month the populations of drones were essentially killed off. Weather around the state during November featured mild days and cool nights with above average moisture conditions. Trade sources report demand for honey by packers from producers was light in response to competition from imports.

MISSOURI, IOWA, EASTERN KANSAS & NEBRASKA * * *

Precipitation was above normal, as all four states experienced nearly two inches of above normal rainfall and snow. Snowfall occurred later in the month, as colder temperatures settled in. Overall, temperatures were mild, nearly four degrees above normal.

Beekeepers report bees are in good condition and populations are normal. Some beekeepers have moved to California and Texas for pollination. Demand for honey remains strong.

MONTANA * * *

After the establishment of high elevation snow packs and needed moisture for dry livestock pastures, Montana's stormy late October weather moderated into a very mild and dry pattern in early November. Glasgow, MT., recorded a daily record high on November 5th of 69 degrees. Two days later on the 7th, Great Falls and Cut Bank recorded record highs of 71 and 67 degrees respectfully. Over the next two weeks, Montana's weather continued to be mild with daytime highs of up to 9 degrees above normal, with very little precipitation. While the warm temperatures promoted wheat emergence and establishment, topsoil moisture levels measured mid month were 45 percent very short, 33 percent short, 22 percent adequate, 0 percent surplus. Several cooler, weather pattern with precipitation through out the state returned late in the month although dry conditions remained as the month ended contrasting the harsher winter conditions experienced early last winter.

Beekeepers continued trucking colonies from Montana to wintering locations in California during November with a few remaining hives left to go by early December from milder regions. Milder regions will continue trucking hives in December. Hives wintering over in Montana have been packed in their winter packs and are settling down to the lower daytime high temperatures. Some hives had to be repacked again after being broken into to combine with other bees to strengthen bees being prepared to be shipped south. Beekeepers continued trips to wintering areas to check on hive security and conditions.

NEW ENGLAND * * *

Winter weather returned to New England on the night of the 10th when temperatures fell to 18 degrees and a new record low was set for November. Two day later on the 12th we had our first snow fall when 3 inches fell across the region. Precipitation remained below normal again for the month and temperatures ranged between the mid 40s to low 50s for the majority of the month.

NORTH CAROLINA * * *

The month of November has been warm, for the most part, throughout the state. Due to the low stores caused by the flooding and heavy rains in the fall, beekeepers will continue supplemental feeding and checking hives for any mite problems. With water levels good throughout most of the state, hopefully, most beekeepers look forward to a good spring honey flow. Due to the Thanksgiving and Christmas holidays, honey sales have been very good.

NORTH AND SOUTH DAKOTA * * *

Most of November, temperatures were above normal with only limited precipitation. Highs in North Dakota were most in the 60's while areas of South Dakota rose into the 70's. Low did dip into the teens the second week of the month. By the 3rd week, daytime highs were again as much as 10-20 degrees above normal. No snow has fallen in Rapid City, South Dakota through November 22nd, approaching it's record-late date of November 24th, of the season's first accumulation. Finally, the last of November, South Dakota reported precipitation in many locations while most areas in North Dakota saw their first measurable snowfall of the season on Thanksgiving Day. While temperatures remained above normal in South Dakota, most of North Dakota had lows in the single digits. Despite the lack of rain and snow, soil moisture levels ended the month at 67-75% adequate.

The bees are reported to be in fairly good condition but the warm temperatures had them taking frequent flights with nothing to collect nectar or pollen from. Feeding was necessary as some hives were wrapped and set in winter locations.

OKLAHOMA * * *

Not much going on except lots of gray, rainy days. Bees are eating their stores so there is a lot of feeding going on in the hives if they are going to survive. Most of the beekeepers have sold their meager excess honey and am getting lots of calls requesting honey. Africanized bees have made their presence known in Oklahoma so inspectors are planning on a few changes in the basic beekeeping classes and people will have to alter their way of beekeeping to some extent. The Oklahoma Department of Agriculture is working with the beekeepers in handling this problem.

TENNESSEE * * *

Bees and hives are in good condition at this time. The weather in November was a little wet, but good over all. The pollen and nectar flow is basically wildflowers and light at this season.

TEXAS * * *

Feeding on what is left of the wild flowers, and some cotton plants. Colonies remain in good condition. Weather has been cooler and rainy. Not much impact on the hives. The supply and demand remains good. The number of hives having to be fed is increasing as the winter is coming on.

UTAH * * *

Most bees are either being stored for the winter or have been taken to California for the pollination season. There was no nectar or pollen collected as seasonal cool temperatures allowed no flight time. Beekeepers are treating for mites as needed.

WASHINGTON * * *

The first killing frost of the season was reported in parts of Western Washington the first week in November while the rest of the State was damp but also cold. Temperatures across the State ranged from 1-6 degrees below normal. The remainder of the month ranged from 11 degrees above normal in Central Washington to 7 degrees below normal along the eastern border. According to the U. S. Bureau of Reclamation, the month ended with only 54% of normal precipitation in the Columbia River Basin. Topsoil moisture the first of the month was rated at 81% adequate and finished November at 79% as precipitation was limited to just a few days.

The bees are reported to be in better condition than the last few years. The honey flow was short and only lasted until mid-June, then stopped until mid-September when another nectar flow began which gave the bees a good start for late fall. Swarms were a problem and contained lots of young bees but good supplies of pollen came in. Hives were moved to winter locations close to crops that will start blooming early next spring. Migratory beekeepers finished moving their last loads from North and South Dakota and Montana into California winter locations. The honey crop from bees that were setting there all summer only produced a fair crop. After this years crop was extracted, colonies were treated before being taken to California.

WISCONSIN * * *

Colonies were reported in fairly good condition despite some cases of mite infestation. Most beekeepers finished fall treatments and wrapping of hives was winding down. Very little floral sources were available for bees to work. Supplemental feeding was underway and candy boards were in place.

Honey demand was reported well in the retail sector. Bulk movement was reported slow due to limited stores in beekeepers hands.
